## Paper Bags Made from Trees

**NAME:**

**DATE:**

Ms. Foster's class learned that one twenty-year-old tree makes about seven hundred paper bags. Then they visited grocery stores to collect data on their weekly use of paper bags.

Using the data below, calculate the number of trees it will take to supply each store with paper bags for one week and one year.

Store	Paper bags used in one week	Number of trees used to make paper bags for one week	Number of trees needed to make paper bags for one year
Green Grocery	3,500		
Eat Right	2,100		
Good Food	5,600		
Best Eats	1,400		
Yummy Food	6,300		
<b>TOTAL</b>
